

Back to school is just around the corner. Get vaccinated today.

Bishop Tonnos Catholic Secondary School In-school mobile COVID-19 vaccine clinic

A return to in-person learning this September for HWCDSB children and youth is a top priority. As a community we know too well the impact that COVID-19, remote learning and public health restrictions have had on the mental and emotional well-being of children and youth. As the Delta variant continues to circulate locally and we see the challenges it has caused elsewhere, particularly among the unvaccinated, we all have a job to do in protecting those that can't be vaccinated, including children under 12.

To provide easy access to a vaccine, the HWCDSB has partnered with Hamilton Public Health Services to hold a COVID-19 vaccine clinic at:

Bishop Tonnos Catholic Secondary School – 100 Panabaker Dr., Ancaster, L9G 5E3

Sunday, September 12, 2021 – 10am-12pm, 1-3pm

The clinic is available to students, families and staff from Bishop Tonnos Catholic Secondary School, plus eligible students (born 2009 or earlier), families and staff from the following Bishop Tonnos elementary feeder schools:

- Corpus Christi
- Holy Name of Mary
- Immaculate Conception
- St. Ann (Ancaster)
- St. Joachim
- St. Teresa of Avila
- St. Thérèse of Lisieux

First and second doses of a COVID-19 vaccine will be provided. Walk-ins are welcome; no appointments necessary.

Note: If you have symptoms of COVID-19, you should not attend the clinic.

[COVID-19 Vaccine Information Sheet for Youth 12-17.](#)

What to bring with you to the clinic:

- Your health card/Ontario Health Insurance Plan (OHIP) card, or, if unavailable, any form of government-issued photo ID (driver's license, passport, Status card, birth certificate, etc). You can also ask your principal to provide an official letter with your name, date of birth and address.
- Immunization record, if available, to keep track of the COVID-19 vaccine.
- Proof of COVID-19 immunization from first dose, if available and applicable.
- An [allergy form](#), if you are allergic to a [component of your vaccine](#).
- Any assistive devices needed.
- Mask that covers the mouth, nose and chin.
- A support person, if required (parent/guardian, interpreter, etc.)
